Tom VAUTRAY

Full-Stack & Architect Software Engineer

Professional summary

Full-Stack Software Engineer, DevOps & **architect** with **4.5 years** of experience. Proven ability to **design, develop, and deploy scalable applications** from concept to production. Strong background in **backend, API development, frontend and frameworks**. Experienced in **Agile teams**. Successfully **deployed an internal QA tool that tripled testing speed during major campaigns**. Passionate about **clean architecture**, and building **efficient software solutions**. Open to **relocation**.

Professional experiences

2022 - now

Full-Stack Software Engineer & DevOps | **Thales** (France, Open to **Relocation**)
►Developed a regression testing application using Shell scripting, **Spring Boot**, Angular, **Docker** & Jacoco
►Frontend Development: TypeScript **React** project with MobX & DeckGL, and several TypeScript **Angular** projects
►Working in a team with **Agile** method

2019 - 2022

Software developer: JHipster/Spring-Boot/Java & React Product design software
Software developer: WAMP/PHP Create/Read/Update/delete (CRUD) app
ISEN ITII Apprentice at **Lapp Muller**
►Programming a solution for a specific need (designing cables)

2019

Software developer: WAMP/PHP - Ticketing Software at **La Croix-Valmer's Town Hall**
►Direct interaction with a non-technical client

Projects

Regressions Detection Tool

Built from **Concept** to **Production**
Developed and **deployed** a regression analysis tool to detect apps defects from commit diffs
Sole developer responsible for frontend (Angular), backend (**Spring Boot**), DevOps & deployment (Docker).
Collaborated with QA engineers to define **functional requirements** and optimize workflows, **tripling testing speed** during major campaigns
Successfully deployed the tool on the company's network

Educations

2019 - 2022

Engineer by apprenticeship
Master's Degree in Engineering, specialized in Industrial IT from **ISEN**,
an institution **accredited** by the **French Engineering Title Commission (CTI)**.
This program integrates **academic studies** with **professional experience** through the ITII partnership.
►Managing a developers team (school class) with GitKraken & GitHub
►Developing expertise through hands-on projects and coursework

2017 - 2019

Aix-Marseille University (AMU):
French diploma comparable to an **Associate Degree** in Electrical **Engineering** and **Computer Science**, typically awarded after two yrs of post-secondary education in the American system
►Discovering programming as a passion
