Skills

Frontend

9 mo	TypeScript **Angular**
9 mo	TypeScript **React**
9 mo	MobX
9 mo	DeckGL
3 mo	ThreeJS

Backend

3 yrs	**Design patterns**
3 yrs	**Java** & **Spring-Boot**
3 yrs	**REST APIs**
4 mo	**Microservices**
6 mo	JHipster
8 mo	Python
1 yr	C++
1.5 yrs	PostgreSQL & MySQL
1 yr	PHP

DevOps

2 yrs	**Git**Flow
1 yr	**Git** CLI
2 yrs	**Git**Kraken
3 mo	**Git**Hub Actions & CI/CD
8 mo	**Docker** & Kubernetes
9 mo	**CI/CD & Shell** scripting
9 mo	**Nexus** administration

AI / Data

3 yrs	Data Engineering
1 mo	LLM Agents [certificate link]

Tom VAUTRAY

Senior Software Engineer

Professional summary

Full-Stack Software Engineer, **DevOps** & **architect** with **5 years** of experience. Proven ability to **design, develop, and deploy scalable applications** from concept to production. Strong background in **backend, API development, frontend and frameworks**. Experienced in **Agile teams**. Successfully **deployed an internal QA tool that tripled testing speed during major campaigns**. Passionate about **clean architecture**, and building **efficient software solutions**. Open to **relocation**.

Professional experiences

2022 - now

Full-Stack Software Engineer & DevOps | **Thales** (France, Open to **Relocation**)
►Developed a regression testing application using Shell scripting, **Spring Boot**, Angular, **Docker** & Jacoco

►Working in a team with **Agile** method

2019 - 2022

Software developer: JHipster/Spring-Boot/Java & React Product design software
Software developer: WAMP/PHP Create/Read/Update/delete (CRUD) app
ISEN ITII Apprentice at **Lapp Muller**
►Programming a solution for a specific need (designing cables)

2019

Software developer: WAMP/PHP - Ticketing Software at **La Croix-Valmer's Town Hall**
►Direct interaction with a non-technical client

Projects

Regressions Detection Tool

Built from **Concept** to **Production**.
Developed and **deployed** a regression analysis tool to detect apps defects from commit diffs. **Sole developer** responsible for frontend (Angular), backend (**Spring Boot**), DevOps & deployment (Docker). **Collaborated** with QA engineers to define **functional requirements** and optimize workflows, **tripling testing speed** during major campaigns. **Successfully deployed** the tool on the company's network.

Educations

2019 - 2022

Engineer by apprenticeship
Master's Degree in Engineering, specialized in Industrial IT from **ISEN**,
an institution **accredited** by the **French Engineering Title Commission (CTI)**.
This program integrates **academic studies** with **professional experience** through the ITII partnership.
►Managing a developers team (school class) with GitKraken & GitHub
►Developing expertise through hands-on projects and coursework

2017 - 2019

Aix-Marseille University (AMU):
French diploma comparable to an **Associate Degree** in Electrical **Engineering** and **Computer Science**, typically awarded after two yrs of post-secondary education in the American system
►Discovering programming as a passion
